

Chair Report

The January 6th hearings have been riveting, unbelievable and frustrating. The information that has been shared has been clear in what happened. For me, it has underscored how criminal the previous administration was and how culpable and subversive T**** was/ys. (Like Steven Colbert, I do not use his name nor do I give him the title he got but never deserved.)

People in this country need to understand we really are at the precipice of losing what our democracy is all about. I have spent years teaching American Government at OC and I have never once felt anything but pride for what we have been given and entrusted to carry on. Up until T**** was elected, I never had a problem with those whose political philosophy was different than mine expressing their views. I have always been a big proponent of civil discourse. But, when the lies and white supremacist views were espoused, I had no tolerance for that.

I find it appalling that the Big Lie is still being spread and the Rs do not have the guts nor respect for our laws and Constitution to call it out for what it is. We cannot let them regain Congress!! Please use your contacts and wits to keep people focused on what needs to be done to keep the Democrats in control. Yes, people are caught up in the economy, gas prices and other issues that can and will be resolved. But, if we don't see the larger picture and stand up to the authoritarianism that comes with the likes of T**** and his ilk, we will lose our future.

Time is limited – November is not that far off. Let's all keep our "eyes on the prize" – Democrats will win!
